# Company Profile

### ABOUT US

JPM Global is an innovative and dynamic Project Management and Business Consultancy providing global independent professional services to a wide variety of industrial sectors including Ports and Terminal Infrastructure, as well as Marine, Energy and Mining Industries.

Our business approach is to work collaboratively with client representatives at all levels of the organisation to deliver quality products and services with results that exceed client expectations.

Established in 2004, we have grown into a successful consultancy business by the continued and consistent application of our values and mission while specialising in the niche market of maritime project management and delivery.

### OUR MISSION

We treat every business opportunity with honesty, integrity and diligence and we evaluate the opportunity in light of our Value statement

We attract skilled, dedicated and loyal employees by living out our Value statement

The customers of our business are employees and their families, suppliers and clients.

We prefer to partner with customers who share our values.

We know that keeping a good client is the catalyst for success in our business.

By success, we mean that we have contributed to the achievement of our Vision while living out our Value statement.

We are excellent at tailoring our services and resources to the clients needs.

Our key to success is our people, their commitment to the company and their skills.

### OUR CAPABILITIES

*Maritime Project Management & Strategic Risk Management*

*Maritime Environmental Consulting*

*Project Management System & Project Delivery Methodologies*

*Marine surveying*

*Underwater Remote operated vehicle inspection*

### MARITIME PROJECT MANAGEMENT

Our team of experienced project professionals can progress a project from any stage between formation and commissioning.

We have proven project performance in port and terminal infrastructure projects and capital asset procurement and acquisition which means we are able to apply learning outcomes from these projects combined with the proven principles of project management to benefit clients.

We are comfortable at project director and project manager levels as well as superintendent and manager levels; in the board room and at the project delivery work front.

### Dredging

Our clients use our skills to reduce and control project risk through the introduction of project controls, contract administration best practice and practical project management controls and monitoring techniques.

We help our clients reduce dredging project cost by:

- monitoring daily dredging activities and materials against the soil models and geotechnical data for the project.
- Develop contracting strategies that deliver results while minimizing risk.
- Manage contractor relationships to deliver project outcomes effectively and efficiently.
- Actively monitor Contractor equipment performance against industry benchmarks.
- Maintain current legal database of case history for dredging cases globally.

We assess implications of scope of work changes, reclamation capacities and performance, dredging equipment choices and spreads and cost implications throughout the project.

Risk reduction practices for wear and tear claim mitigation, overall project impact and risk assessments from pre-tender to mobilisation and dredging, scheduling and planning forecasts and cost predictions form part of our standard dredge project management offerings.

### Construction

Land and sea reclamation construction forms part of our skills portfolio as well as the management of the environmental and safety elements of the project. We measure and monitor materials balances, bulking factors and reclamation rates to ensure the land reclamation objectives are achieved without negative surprises.

#### Gladstone Ports Corporation – Australia

Creation of 274 ha port land through the dredging of 24 million m<sup>3</sup> material. Project value in excess of AU\$1.2bn over four years.

### VALUES

We are a team of professionals giving our best daily

We are in business to make profits of our business ventures

We see no global boundaries for our business opportunities

We believe in the importance of adding value to all stakeholders in a business venture

We treat every business opportunity with honesty, integrity and diligence and we evaluate the opportunity in light of our Value statement

We attract skilled, dedicated and loyal employees by living out our Value statement

### OUR PEOPLE & STRENGTHS

JPM Global's greatest pride is the quality and standard of the people that we employ. Each employee has been purposely recruited to bring a specific repertoire of skills to the business and increase our ability to add value to our client relationship

### SUCCESS

We measure our success by the degree to which we influence positive client project outcomes and the building of long term relationships with all project stakeholders.
