# Company Profile

## EXCELLENCE IN MARINE CONSULTING

JPM Marine is a subsidiary of JPM Global; an innovative and dynamic Project Management and Business Analysis Consultancy providing independent professional services to a wide variety of industrial sectors including Public Infrastructure, Marine and Mining Industries. Our business approach is to work collaboratively with client representatives at all levels of the organisation to deliver quality products and services with results that exceed your expectations.

# flexible services for your marine needs

## OUR CAPABILITIES

We have a core of competent, qualified marine professionals that are ready and flexible to travel Australasia wide to meet customer needs. Our competitive advantages are in the marine and maritime sectors where we have a proven ability to add value to business and project development. The engagement of our services by past clients has led to the establishment of several large scale projects and new business realisations in the areas of marine assets, infrastructure and port development.

### Specifically we provide the following services:

- Marine Surveying – class, cargo, condition, damage.
- Pre purchase inspections & reporting.
- Marine incident investigations and reporting.
- Dry-docking and repair management – scope, quality and cost control.
- Maritime project management – initiation, planning, execution, closure.
- Business analysis

JPM Marine are qualified, accredited and licensed to carry out the following services:

- Panamanian Flag State Inspections
- IBSClass classification society surveys
- Pre-purchase and condition surveys
- Maritime/port security audit
- ISM/ISO 9001 Systems audits
- Maritime incident investigations
- Dry docking scope of work and project Documentation
- Overhaul/refit and dry docking project management using ISO 9001 accredited project management system.

## OUR PERSONNEL

Our personnel include qualified:

- Master Mariners,
- Chief Engineers,
- Naval Architects,
- Ship Yard Project Managers
- Commercial Experts on permanent staff.

Our staff has extensive national and international experience as well as qualifications from the best Australian and European Maritime training facilities.

## OUR MARINE SERVICES INCLUDE ALL FACETS OF THE MARINE ENVIRONMENT

## OUR PEOPLE & STRENGTHS

JPM Global's greatest pride is the quality and standard of the people that we employ. Each employee has been purposely recruited to bring a specific repartee of skills to the business and increase our ability to add value to our client relationships.

Our strengths cover the areas of Marine Survey and Engineering, Project Management and Tendering, Strategic Business Management & Planning, Business Development, Financial Analysis and Market Development.

Our combined experience results in a flexible and strong base for maritime consulting in Australasia.

## PROJECT MANAGEMENT

Maritime Project Management

Business Consultancy providing global independent professional services to a wide variety of industrial sectors including Ports and Terminal Infrastructure, and Marine Industries

Capital Asset Procurement and Acquisition which means we are able to apply learning outcomes from these projects combined with the proven principles of project management to benefit clients

## SURVEYS & INSPECTIONS

Our Marine Survey team conduct inspections, surveys or examinations aboard shipping vessels to assess, monitor and report on the condition of the ship, for Classification Surveys, Insurance, Cargo, H&M and Condition Survey requirements.

We also offer a management service to visit manufacturers and suppliers of equipment intended to be installed in new or existing vessels, to ensure that standards are maintained, and that equipment complies with predetermined standards and specifications.
